

SoFar:

- + under 20x20mm & SMT on only one side for 'Letter' postage.
 - + M2 mounting holes
 - + Optional power resistors
 - + Optional regulator for typical automotive power
 - + Optional pin header for breadboard etc.
 - + Could cut at pin header for direct PCB mount by castellation
 - + Added test points for direct soldering if not socketed
- Corrected polarity of Ch1 input.
Oriented all resistors so IDs are same way up.
